

# GS R1521 Handheld Barcode Scanner

## Durable and Rugged for All-Day, Every-Day Use

GS R1521 is dual tested for durability—drop and tumble. Mid-ship drop it on concrete from 4.9ft/1.5M, tumble it from 3.9ft/1.2M with frequency of 10 times per minute for 24000 times. GS R1521 is engineered for durability and uptime.

## Triggers built for intensive scanning

The triggers are used for millions of pressing - instead of the typical few hundred thousand trigger presses. It is obvious that the frequency of replacing triggers getting lower, and also the cost.

## All-day comfort that workers can count on

The ergonomically designed grip provides maximum comfort, even in the heavy-duty scanning environments, which reduced greatly user fatigue and increased productivity.

## The Flipgrip is easy to assemble and clean

It is very easy to assemble on the scanner, just press and release the lock it will be fixed. Because of the small size, it is also very easy to clean.

NFC pairing saves at least half of the connection time. Using the NFC makes the Bluetooth connection more convenient and faster. User can simply tap the scanner with any NFC enabled device. No need to open the Bluetooth settings to identify and select the device.

## Maximum replaceable parts bring minimal downtime

The removable and inseparable scanner body and battery minimize the on-site time of reassembly process. Furthermore, the one-second inseparable battery makes sure scanners have virtually no downtime. There is no need to worry about dead battery to influence your daily working anymore.
