PX45 AND PX65 SERIES PRINTERS

High-Performance Industrial Printers

The PX45 and PX65 Series industrial printers are built to meet the needs of round-the-clock, mission-critical applications. These rugged printers deliver advanced connectivity and network protocols, ensuring peace of mind today and a reliable, scalable solution for the long haul.

The rugged, all-metal PX45 and PX65 printers deliver outstanding performance — up to 12 inches per second from field data to label — and incorporate features that reduce downtime and minimize maintenance costs. Both units are available with 203 or 300 dpi resolution, and the PX45 also offers 406 dpi for precision labeling without any loss of speed. This is ideal for compliance labeling applications with variable data encoding in readable results.

The PX45 and PX65 printers' smart design features support increased productivity in demanding environments. As Smart Printers, they can host stand-alone applications, developed through the Fingerprint and C# programming languages, helping reduce errors and streamline operational processes.

The printers' device management and diagnostic capabilities – provided in web-based Printer & Configuration Management tool, configuration tool PrintSet MC for mobile devices and cloud-based Operational Intelligence – reduce downtime and simplify deployment. Replacing printheads is fast and easy, thanks to the magnetic QuickMount™ printhead design. The PX45 and PX65 printers are so engineered and tested with Honeywell labels and other media products, optimizing performance when used with genuine Honeywell media.

The PX45 and PX65 Series industrial printers are flexible, compact, and programmable, enabling customers to optimize their printing operations, streamline deployment, and achieve quick return on investment.

FEATURES AND BENEFITS

The PX45 and PX65 printers' compact modular design facilitates integration into automated labeling applications.

Smart Printers can eliminate the PC and control other devices directly to cut on scanners, scales, and applicators, improving efficiency and decreasing infrastructure and costs and complexity.

With user-selectable, all-in-one printer command languages (ZSim II™, IPL, DSim II™), the PX45 and PX65 printers fit with ease in simplicity in mixed printer environments, supporting fast deployment.

Customers can future-proof their LO LED operations by connectivity and high-speed USB ports, encouraging easier, enterprise scalability. Multiple interface options are available.
