ReMoCloud Express

Smarter Android Device Management for Growing Enterprise Fleets

ReMoCloud Express™
Mobile Device Management

Remote Control | APP Management | Scalable Enrollment | Device Monitorina | Geofencing

ReMoCloud Express™ is a mobile device management solution for Android enterprise deployments. It offers fast provisioning, real-time updates, and centralized control for GMS, non-GMS, and AOSP devices. Ideal for managing diverse fleets across logistics, retail, healthcare, and manufacturing without relying on on-site servers.

High-Speed Remote Deployment

Quickly deploy and update thousands of Android devices to ensure fast scaling and efficient enterprise operations.

Offline-Ready Security and Geofencing

Trigger automatic lockdowns or remote wipes based on location, even when devices are offline, ensuring airtight data protection.

Team Remote Control

Multi-user live access to the same device remotely for collaborative troubleshooting and faster issue resolution across teams and partners.

Broad Device Compatibility

Manage Android devices across GMS, non-GMS, and AOSP environments, including non-CipherLab hardware, with seamless control and deployment that depends on cloud-native architecture, requiring no on-site server infrastructure.

Smart Geofencing

Automatically enforce policies like lockdowns or data wipes based on device location. Operates even when offline, providing an extra layer of security and compliance for mobile deployments in the field.

Centralized Fleet and Role Management

Manage large device fleets and user roles from a unified cloud-based portal. Create sub-fleets, assign structured permissions, and enable single sign-on for secure multi-organization administration across branches and subsidiaries.

End-to-End Security

Protect sensitive data with security measures, including encryption, lockdown profiles, app and web access restrictions, and secure over-the-air updates to ensure ongoing compliance and reduce vulnerabilities.
