GENESIS XP 7680g

Flexible Presentation Scanner

The Honeywell Genesis™ XP 7680g is a hands-free presentation scanner that delivers an impactful customer experience while increasing business productivity.

BIG VALUE IN A SMALL PACKAGE

Increased Productivity

The Genesis XP features 20% faster scanning speed and a larger scanning area than previous products. Honeywell's field proven XP scanning technology handles poorly printed and damaged barcodes with ease. Impressive depth of field allows barcodes to be read even if placed right at the face of the scanner.

Featuring a full 1 mega-pixel imager and fast processor, the Genesis XP reads barcodes fast and handles a high level of motion tolerance resulting in fewer repeat scans, keeping employees productive and efficient.

Fantastic User Experience

The compact and modern design offers a contemporary experience with minimal counter space required. The 360° tri-color LED ring highlights the scanning target area and provides clear user feedback, offering an intuitive experience for both employees and customers.

The scanning user experience is a key element for delightful customer engagement. The warm, white light illumination is more pleasing to the eye. The automatic object detection feature turns the illumination completely off between scans, so the scanner is not a distraction.

Flexibility and adaptability

The Genesis XP was designed with flexibility in mind allowing it to easily adapt to the workflows of today and tomorrow.

The removeable and adjustable compact stand and angled cable attachment point will allow the product to be placed almost anywhere.

A line of additional smart placement accessories is available for the Genesis XP supporting wall mount, POS mount and downward facing installations. The Genesis XP and smart placement accessories are disinfectant-ready.
