Product Concept

What is KOAMTACON DMS (KDMS)?

KOAMTACON DMS (KDMS) is an innovative KOAMTACON Data Management Suite where users download preloaded data collection applications and manipulate the collected data for their business without any professional programming or IT knowledge. With a variety of apps from ticketing to warehouse management, KOAMTAC has you covered. It has never been so easy to collect data via barcodes, RFID, or Magnetic Strip!

The Best Business Management App Suite for KDCs

The first solution of its kind, KOAMTACON is a data collection cloud suite designed specifically to be used with KDC Bluetooth barcode scanners and RFID readers to collect data in any situation.

Perfect for YOUR business

It is so easy!

KOAMTACON comes pre-loaded with apps ready to collect your data. You can use one or all of them. Each app is customizable to suit your needs. Plus, we're developing new ones every day!

Simply pair your KDC Scanner to your smartphone, tablet, or PC, open KOAMTACON, and start collecting barcode, RFID, MSR, or GPS data - the possibilities are endless. Use your smartphone or tablet to supplement your data with photos or signatures for verification and we will host them in the cloud for you, easily accessible via the app.

Quick to Launch

By yourself or with KOAMTAC's unparalleled support, your business can be up and running on KOAMTACON in as little as one hour. Just download the app from your favorite app store, enter your activation code, and go!

Simple to Maintain

Synchronize data with all app-enabled devices automatically. No extra steps required.

Easy to Use

Sign in, connect your scanner, and scan! Effortlessly collect, modify, verify, and report on data in any situation with just a few clicks. No need for thick manuals or long tutorial videos, KOAMTACON is easy as 1-2-3!

In the Cloud

Wherever you go, KOAMTACON can go with you. And with the power of the cloud, updates are done in real time.

Compatible with Any Device

Whether you are an Android or Apple user, KOAMTACON will work for you.

To Get Started

There are two ways to get the credentials to get started:

- New KDC users: Go to https://koamtacon.com/koamtacon-mobile-data-management-suite/ and sign up. (see next chapter)
- Existing KDC users: If you already have KDCs in possession and login credentials, you can sign in and register more KDC's for the more member users. (https://services.koamtacon.com/sign/signin?userSort=0)

How to Use I : KOAMTACON Portal & Web Console

Sign Up

1) First, you need to create your new User ID. You should go to KOAMTACON portal (https://koamtacon.com/koamtacon-mobile-data-management-suite/), complete the application form with your preferred User ID below, and then submit. The first User ID you create will be the Owner ID.
2) Here is detail information for each item:

1. Select "KDC Mobile Data management Suite".
2. Input box for user id: Enter your id.
   - ID must be between 8 – 15 characters.
   - ID can contain letters, numbers, or period.
   - ID must contain at least one letter.
   - ID is case-sensitive.
3. Button for checking ID duplication: Click to check if your ID already exists.
4. Input box for email address: Enter your email address.
5. Input box for name: Enter your name.
6. Input box for phone number: Enter your phone number.
7. Input box for company name: Enter your company name.
8. Input box for URL: Enter URL of homepage of your company
9. Select box for country: Select your country.
10. Button to submit: Click to submit your entries.

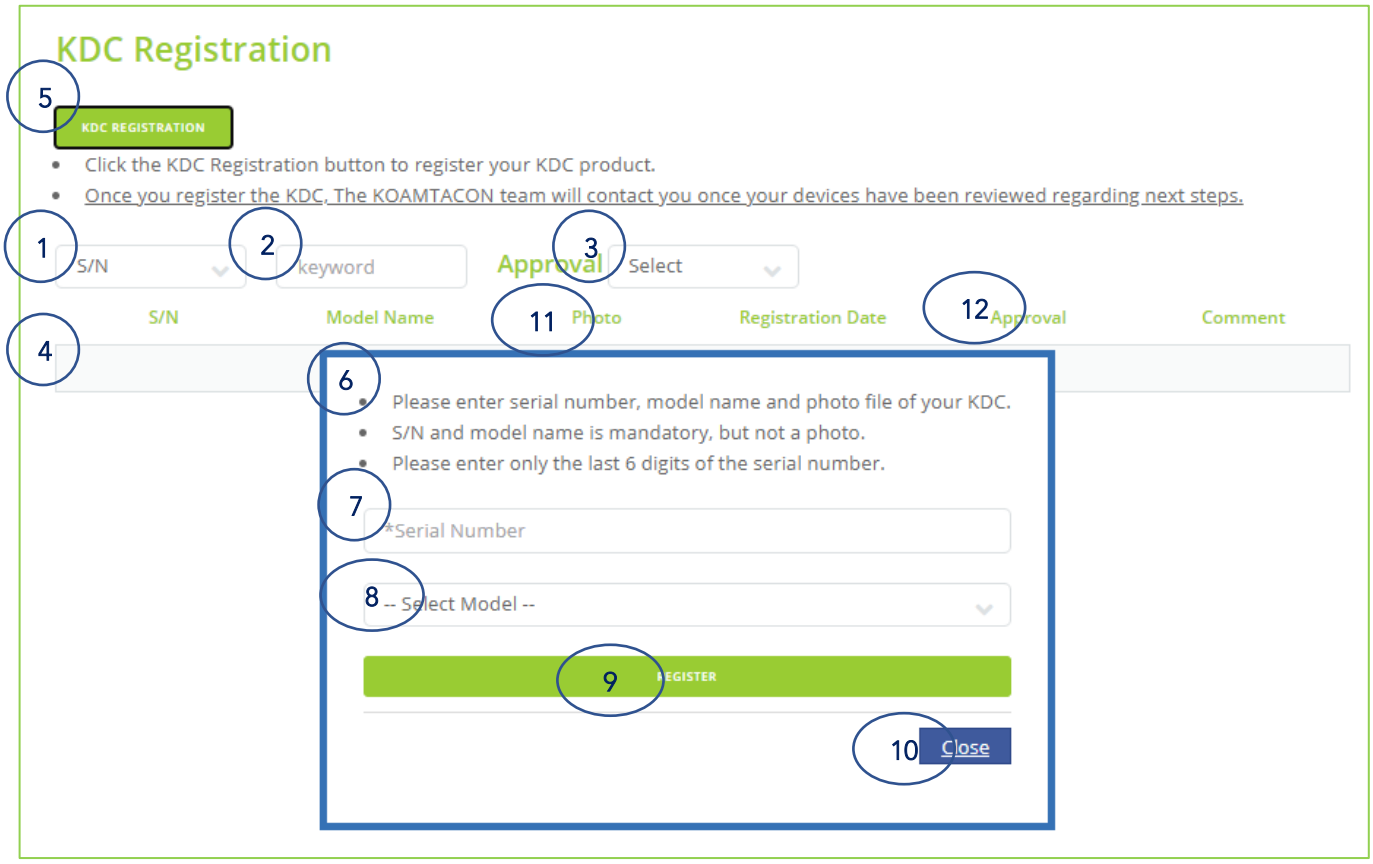

116 Village Blvd, Suite 305, Princeton, NJ 08540 USA
T: + 1-609-256-4700 F: +1-609-228-4373
info@koamtac.com www.koamtac.com
© 2018 - 2022 KOAMTAC, Inc.

11. Agreement message for terms of use.
    - 'Terms of Use': Link to page of site terms

3) When you submit the sign up, you will be automatically redirected to KDC registration site and you should register KDC's you purchased.

KDC Registration

1) After sign-up, you should register at least one of your KDC products you purchased from KOAMTAC or its resellers before you are able to sign in.
2) You can register KDC products one by one or in a bulk by submitting an EXCEL template sheet to register all products at once. (The template can be downloaded from this location)

1. Select box for searching: Select field to search.
2. Input box for search terms: Enter search terms.
3. Select box for searching: Select field to search.
4. Data table: If you enter data, the data is displayed in this table.
5. Button to register KDC: Click to open the popup for KDC registration. (You'll see another popup to upload an excel file)
6. The popup for KDC registration.
7. Input field for serial number of KDC: Enter the serial number of your KDC.
8. Select box for KDC model: Select model of your KDC.

© 2018 - 2022 KOAMTAC, Inc.

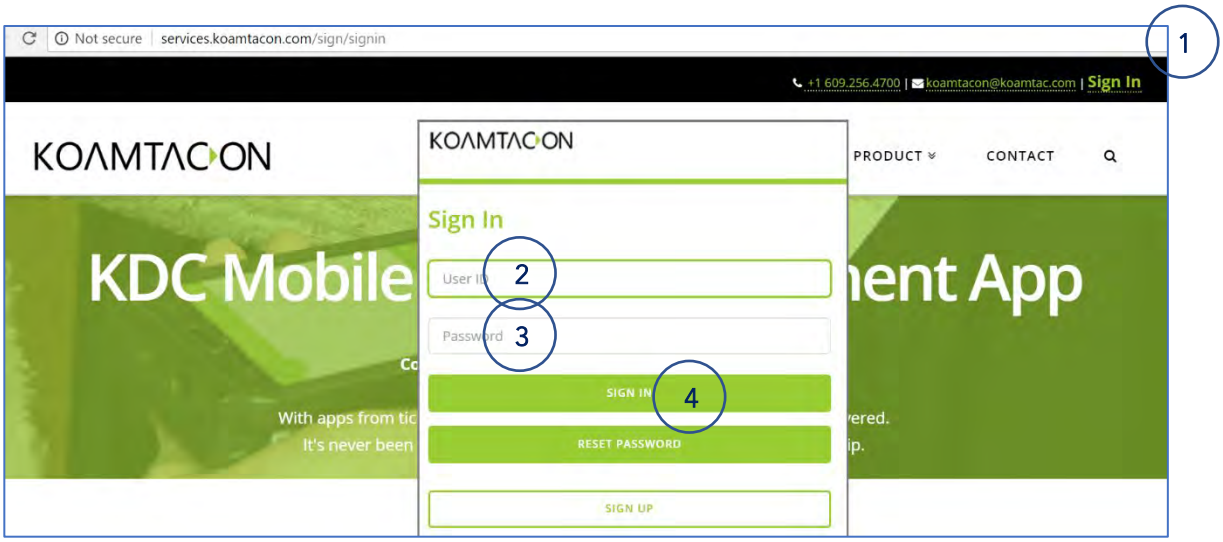

9. Button to submit: Click to submit your entries.
10. Button to close: Click to close the popup.
11. Photo field: If you registered the photo of your KDC, this field is displayed. Click to see the photo you registered.
12. Approval field: Approval status is displayed. You can register an additional member by the count of approved KDC.

3) Once you complete the KDC registration, you will receive an approval or rejection email from KOAMTACON. And once it is approved, you will receive a welcome email from KOAMTACON in 2~3 business days with the registered ID, a randomly-generated temporary password, and the activation code for the mobile client application, which is KoamTacON downloaded from the stores.

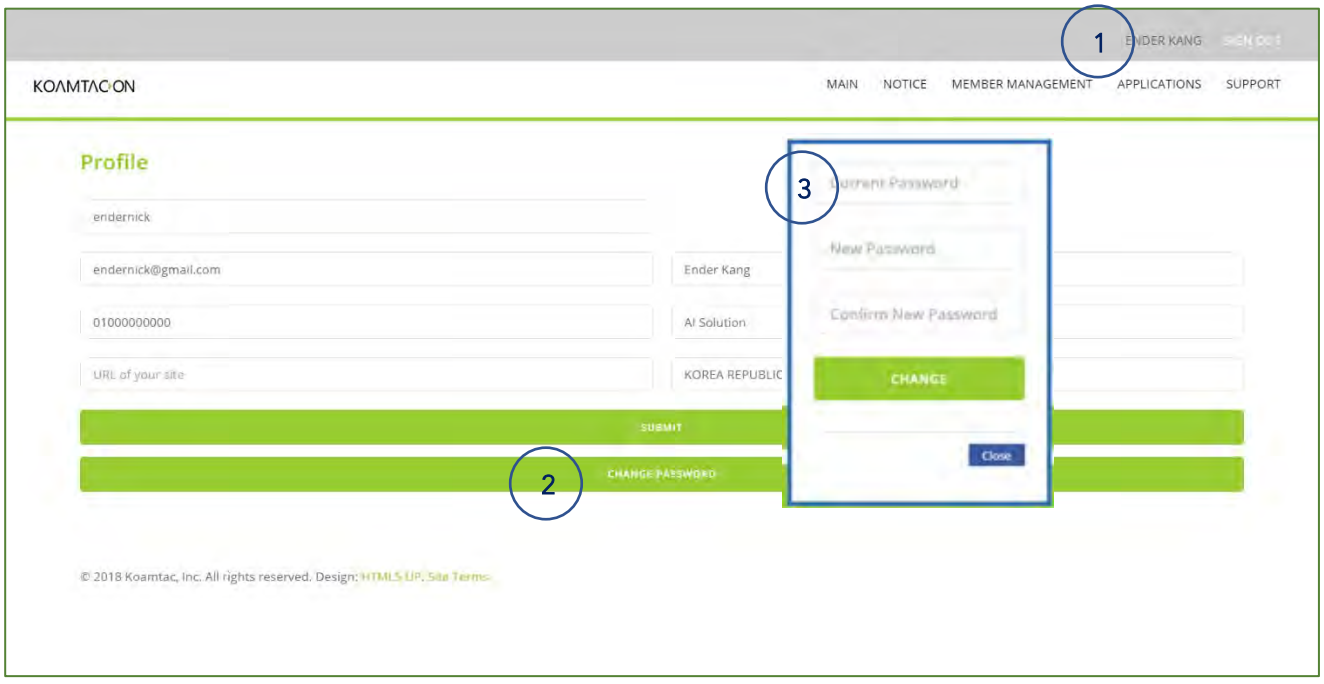

116 Village Blvd, Suite 305, Princeton, NJ 08540 USA

Sign In / Member ID Creation

1) Now you can sign in with your ID (Owner ID). The first thing to do is to change the temporary password.

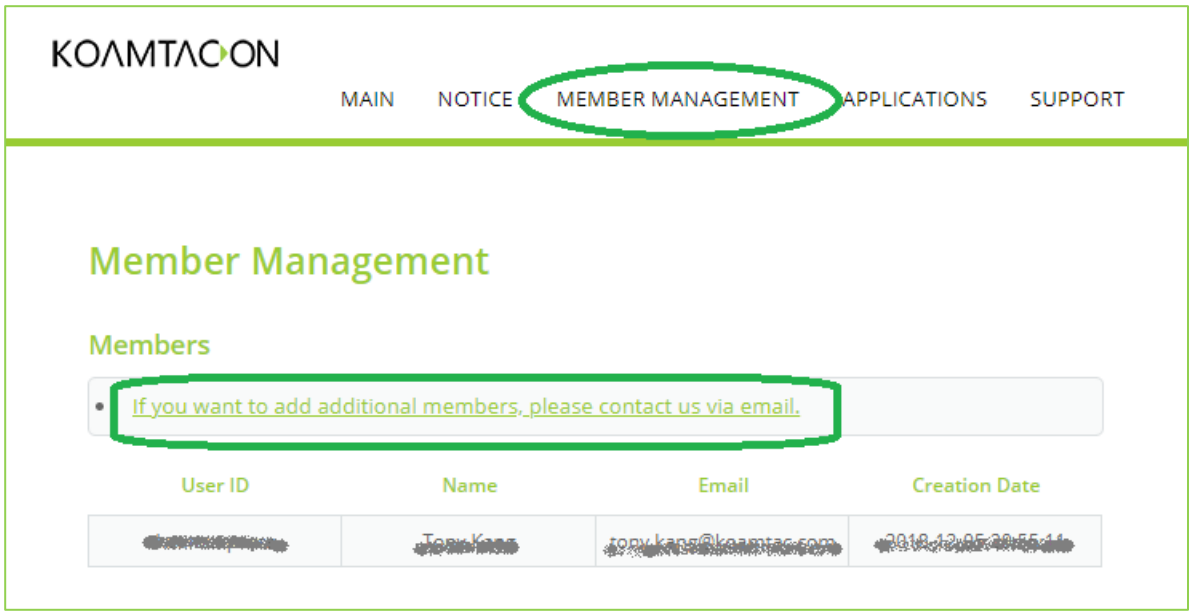

2) You can also change the profile including the password any time.

1. Click to move to edit your profiles.
2. Click to change the password.
3. Put the current password and new password.

© 2018 - 2022 KOAMTAC, Inc.

3) You can request as many Member ID's to KOAMTAC as the number of KDC products you registered from the MEMBER MANAGEMENT menu. You can request the member registration by email with KDC serial number information.

Web Console for Each Application

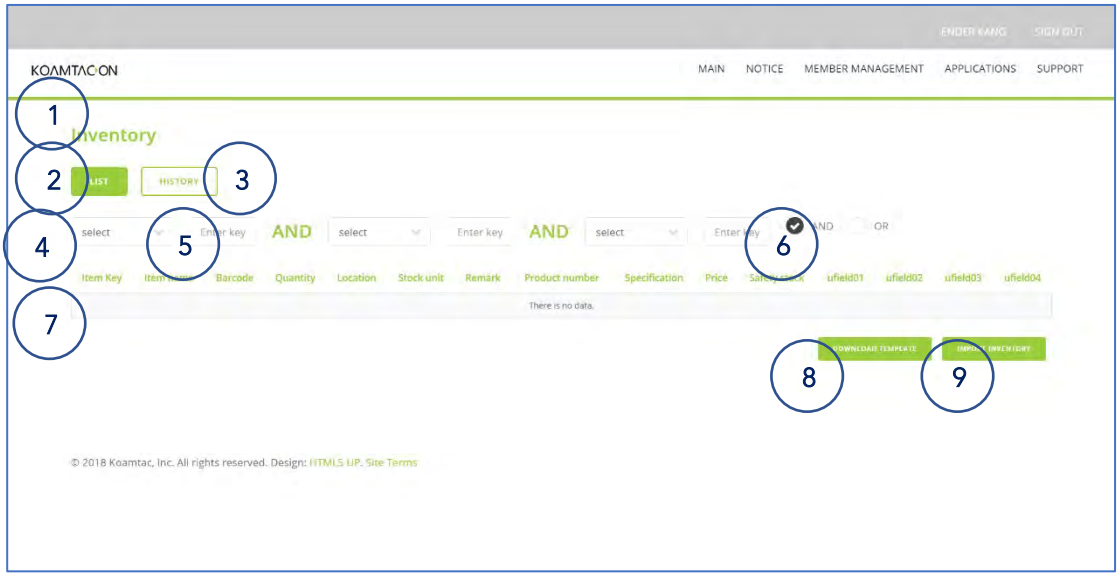

1) When you sign in, you can see the main screen with all the applications that are connected to each mobile application on the mobile device.
2) Currently, there are 8 applications: Inventory, Purchase Order, Retail, Delivery, Rental, Field Service, Ticket Validation, and Treasure Hunter. This will be growing and growing as we plan to release more apps in the future. In general, these applications are not customizable.
    a. **Inventory:** Solve inventory management problems and manage incoming, outgoing, and sitting stock. This simple system ensures even the newest employee can input new products and accurately count the current stock. Reporting can be easily and quickly done at any time to check progress and ensure inventory is right on track.
    b. **Purchase Order:** Set up automatic orders to replenish constantly revolving stock while maintaining the ability to manually create a purchase order for any vendor. Combined with the power of a KDC, there is no need to return to your desk to finish orders. Integration with any inventory system guarantees you have product when you need it.
    c. **Retail:** Answer any customer product inquiry with a quick scan or search. Create orders and check the cloud-managed inventory for other stores right from your store floor. Complete orders for customers without directing them to a computer or customer service area.
    d. **Delivery:** Manage every aspect of deliveries from customer information to status updates. All delivery information links with master data in the cloud and can be managed from a main dashboard. Photos are easy to add to all deliveries whether delivery was successful or not and integration with Google Maps ensures the best route is easy to find.
    e. **Rental:** Supporting rentals from initial signup through return and every step in between. Manage all your products, the rental term, and customer information directly in the app. Exporting a high-level PDF report is done simply through the app, eliminating the need for you to return to your desk to do paperwork.
    f. **Field Service:** Maintain detailed work logs complete with location, time, and notes. Integration with Google Maps ensures every location will be easy to find and eliminates the frustration of moving from app to app. Report data on all work done in the field can be sent with just a few clicks - eliminating the need to return to a centralized location such as an office.
    g. **Ticket Validation:** Check tickets with a quick scan against all master data in the cloud. Manage several events from one central hub and allow validation right away. Run a quick report to track number of tickets validated and remaining for your event at any time directly from the app.
    h. **Treasure Hunter**: Identify when a product is at a great price so you can act fast. If you are a Fulfillment by Amazon (FBA) or Merchant Fulfillment Network (MFN) seller, the Treasure Hunter app helps you earn money by selecting only the best items for your inventory and ensuring you make the most money in as little time as possible.

Database Creation for Each Application

1) The web console for each application has an upload button, so you can use this menu to upload the product information in a bulk. The template can be downloaded from each web console for each app.

1. Inventory page (example)
2. Button for inventory data: Click to manage the inventory data.
3. Button for history data of inventory: Click to view the history data of inventory.
4. Select box for searching: Select field to search.
5. Input box for search terms: Enter search terms.
6. Radio button for selection of 'and', 'or': If you select 'and', then all search conditions are combined with 'and', If you select 'or', then all search conditions are combined with 'or'.
7. Data table: If you enter data, the data is displayed in this table.

© 2018 - 2022 KOAMTAC, Inc.

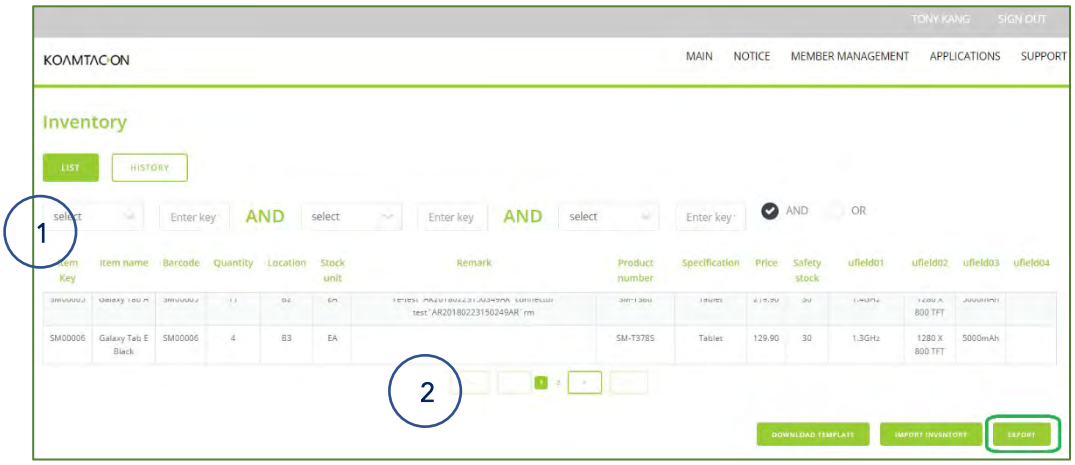

8. Button to download the template: Click to download template file for importing the data.
9. Button to upload the excel file: Click to upload the excel file to import the data.
   - Popup to upload the excel file.
   - Button to select the file: Click to select the excel file for importing data.
   - Button to submit: Click to submit your entries.
   - Button to close: Click to close the popup.

2) This is one of samples (Inventory) for the database templates:
NOTE: Product image cannot be loaded through the template. The image should be loaded right from the inventory application on the mobile.

MA_INVENTORY

Key	Item name	Barcode	Quantity	Location	Stock unit	Remark	Product number	Specification	Price	Safety stock	ufield01	ufield02	ufield03	ufield04

3) Once it is uploaded, you can view all the synchronized collected data and any collected data (database) for each application. That database can be exported to a file again.

1. Data table: If you enter data, the data is displayed in this table.
2. Paging block: This block is displayed if the number of data is more than 11.

IV. Delivery

Manage every aspect of deliveries from customer information to status updates.

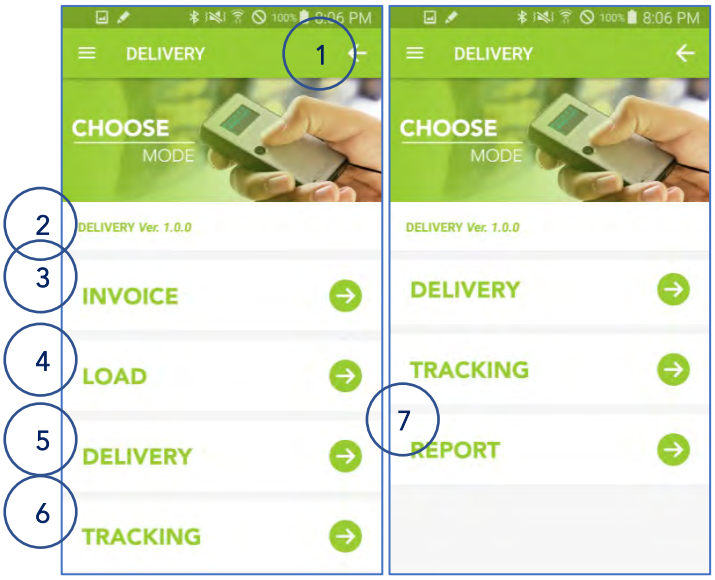

Key functions

- Invoice
  - ✓ You can create and edit a delivery job.
  - ✓ You can create a delivery job from rental or retail lists.
  - ✓ You can create a delivery job from a previous delivery job.
  - ✓ You can enter multiple addresses for a single customer.
- Load
  - ✓ By scanning a barcode, item status is changed to the loaded state.
  - ✓ It is possible to check whether individual items are loaded or not.
  - ✓ If item is loaded, stock quantity is deducted from inventory. But the list generated by rental or retail is an exception (the stock quantity is unchanged).
- Delivery
  - ✓ Directions with google maps.
  - ✓ Dial from list.
  - ✓ Take a picture of a delivery item.
- Tracking
  - ✓ You can track the status of your job.

Function Points

- You can tap the back button to go to the previous screen.
- You can take pictures regardless of the delivery result.
- You can search by various fields.
