→ How to set up in Windows

STEP 01 Ensure your scanner is operating in SPP mode and is paired with its dongle.

STEP 02 In ScanBridge Windows, click on the "Activate" button to connect with your scanner.

→ How to set up in iOS

STEP 01 Attach your scanner with your iPhone or iPad.

STEP 02 Launch and allow ScanBridge to run to complete the automatic pairing.

→ How to set up in Android

STEP 01 Choose preferred pairing method (scan or tap to connect)

STEP 02 Confirm the pairing pop up to complete the pairing.

Easy pairing

It's exceptionally easy to pair your scanner with the ScanBridge app and ready to collect your barcode inventory in seconds.

Scanner Auto Configure

Auto Configure function automatically enforce settings on the scanners with preset configurations whenever they are connected with ScanBridge. This tremendously reduce the time to setup a larger quantity of scanners.

Staging Barcode (Windows Only)

Effortlessly generate a staging barcode from a variety of settings; a few straightforward barcode scans complete the scanner setup, eliminating the need for a PC connection.

Scan Check*

Scan Check allows users to perform barcode checks by comparing 1 barcode to another; or 1 barcode to multiples. Even more, there is a rule based rules check for user to setup. ScanCheck History is available for ScanBridge Android for users to keep track on the scans.

Data Wedge*

ScanBridge supports 3 data output methods:

1. **Copy & Paste:** fastest way to scan barcode into your apps
2. **Keyboard Emulation:** most compatible to any app at a little bit more time
3. **Network Wedge:** send the scanned data to a web service

Profile Management & Data Editing

Users can create multiple profiles with different output rules, such as adding prefixes or suffixes, changing text case, or using regular expressions with advanced rules. They can also apply these profiles to specific apps or specific symbologies, making it easier to organize and manage data.

* Supported features may vary on different scanner models or operating systems.
